The International Conference on Symmetries, Differential Equations and Applications, (SDEA-II) will be held in the beautiful green city of Islamabad, Pakistan, at the base of the Margalla Hills and close to the historical site of the first University in the world at Taxila. SDEA-I was held at DECMA of the School for Computational & Applied Mathematics, University of the Witwatersrand, Johannesburg, South Africa at the bicentenary of Evariste Galois in 2012. SDEA - II is held at the sesquicentennial of the presentation of the Theory of Electromagnetism to the Royal Society by James Clerk Maxwell in 1864. The conference is aimed to provide a unique platform for young researchers, faculty and especially students to interact/collaborate with distinguished researchers from all over the world working in the area of symmetries and conservation laws to study underlying geometrical structures and integrable properties of differential equations.
