☰ Conflict resolution opportunities

CrisisWatch summarises developments during the previous month in some 70 situations of current or potential conflict, listed alphabetically by region, providing references and links to more detailed sources. It assesses whether the overall situation in each case has, during the previous month, significantly deteriorated, significantly improved, or on balance remained more or less unchanged. It identifies situations where, in the coming month, there is a risk of new or significantly escalated conflict, or a conflict resolution opportunity (noting that in some instances there may be both). It also summarises Crisis Group's reports and briefing papers published the previous month.

Arrows and alerts: Up, down and side arrows signify, respectively, improved, deteriorated or unchanged situations. Conflict Risk Alerts (identified with bombs) or Conflict Resolution Opportunities (with doves) are used in addition to arrows: a bomb signifies a risk of escalated violence; a dove an opportunity to advance peace. Both bombs and doves tend to be used where events are moving fast.
