MKT-438 New Product Development and Design

Cr Hrs: 3.0

Course Description

Organizations have become increasingly dependent on new product development as a source of innovation and profitability. This course facilitates learning of the product development process and the factors that influence success and failure at each stage of the process. Moreover, the course examines the strategic planning, development and launch of new products in companies from a marketing perspective. The course covers strategy, analysis and organizational issues in new product development and innovation. An emphasis is placed on discussion of the NPD process across physical goods and services.

Course Objectives

The course is intended to provide you with the following benefits:

- Develop competence with a set of tools and methods for product design and development.
- Understand the importance of new product development to firm performance.
- Develop familiarity with models of innovation.
- Learn methods of generating, evaluating and testing product ideas.
- Improve your ability to think creatively in the product/service innovation context.
- Teach you concepts, tools and best practices used in the industry.
- Reinforcement of specific knowledge from other courses through practice and reflection in an action-oriented setting.
- Prepare you for a career in new product development, innovation or related functions.

Learning Outcomes

As part of this course you will walk away with a series of skills that will enable you to step into a product development team at a variety of physical goods or service organizations. Moreover, you will be exposed to a number of techniques and approaches for fostering innovation within established organizations. In addition to these general outcomes, you will be armed with a series of specific analytical/consulting tools:

- First mover advantage
- Reasons for new products failure
- New product Adoption & Diffusion
- The lead user approach to new product development
- Product development at IDEO
- Stage-Gate Development Process
- Understanding Customer Needs through Empathic Research
- Running a Brainstorming Session
- New Product Forecasting Models
- Market Testing
- Conjoint Analysis and New Product Pricing
- Customer Lifetime Value Calculations
- Product Portfolio Management Techniques
