Pre-requisites:	None		
Course Description:	<p>The course aims to provide students with an understanding of architectural discourse and theory. The course shall build the ability of students to articulate concepts of form, space and sociability in their context via criticism. Historical narratives create the framework of social and political events that form the paradigm of architectural relevance. Architectural theory formulates the baseline of creating extracted philosophies that can be used as analytical tools to deconstruct the historical present and future scenarios.</p>
