Special Topics in Bioinformatics

Semester No	Code	Credit Hours
7/8	BI-436	3-0

Course description:

This course intends to introduce recent advances in bioinformatics both in academia as well as industry.

Prerequisite: Bioinformatics-I

Course Outline

The course will review the major advances in bioinformatics; the topics will be selected by the faculty members and HoD. A faculty member after topic selection will teach 70-80% of the topics. For rest 30-20% topics, guest speakers from academia as well as industry will be invited for lectures to provide an understanding of required bioinformatics skill set in different academic/industrial setup.
